Pump Controller

Want to cut down the time spent managing your irrigation?

Tired of having to constantly stop & start your irrigation and adjust your gate valve?

Fed up with constantly attending your pump shed?

Nairn Pump Control can give you three zones of control, select from:

- Delivery pressure
- Flow
- Suction pressure
- Well level
- Reservoir level

Works with surface, submersible, line shaft (turbine) pumps.

The Nairn Pump Controller talks to your Variable Speed Drive, constantly monitoring the available feedback to control your pump and give you a constant, smooth pressure system.

The Nairn Pump Controller can be installed new with our Variable Speed Drive, or retro fitted to your existing system to get the most from your Variable Speed Drive. Features Include:

- Automatic pressure system control for non-attendance of pump shed
- Smooth, controlled pipe fill function
- Reduce high pressure spikes and water hammer
- Flow control to avoid consent issues
- Avoid over pumping wells
- Cascade control for multiple pumps
- Pivot compensation
- Multiple setpoint selection
- Power savings
- Lift pump, jockey pump and tank fill control capable

We have worked with pumping systems for over 30 years and have designed a controller to meet your every pumping need.

We know what works and understand what is required to make pumping control easy.

Let Nairn Electricals experience and knowledge make your system work for you.

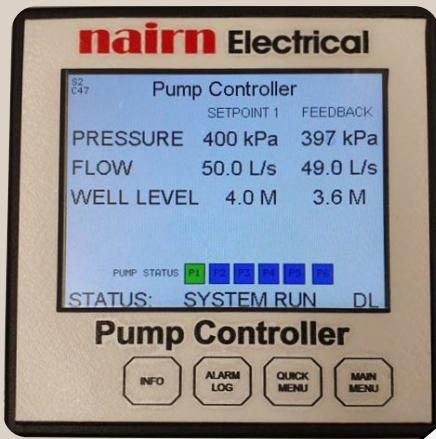

"We use Nairn Electrical for our pumping electrical systems because they supply a system that works with clear safety protections and backup support."

PYE GROUP, CANTERBURY

North Canterbury: 03 313 6104

Leeston: 03 324 3752
